

ON FOCUS
To our Sponsors – Update from
FOCUS Clinical Drug Development GmbH

Periodically we inform our sponsors about our capabilities and accomplishments.

The recent **FDA Pre-Approval Inspection** audit in our clinical and office facilities in Moscow (Russia) was flawless, and resulted in a no FDA 483 remarks for the sponsor.

Our Preclinical Facility in Heidelberg (Germany) was GLP qualified in February, 2009.

Several First-in-Human studies with biologicals have been performed in our Hospital-based ward in Düsseldorf (Germany). This unit just has been upgraded from 6 to 12 beds.

Our expertise in the conduct of ethnic bridging studies has been expanded by the addition of more Asian and African ethnicities, and a broader range of study objectives.

Recently we created a Pharmaco-Imaging Center with three University experts in the region of Neuss, Germany. By adding these high-tech imaging technologies to the FOCUS exploratory clinical expertise, we hope to offer our sponsors more opportunities to perform state-of-the-art studies.
